## NOW

CO-FOUNDER

### Caspian

Building an AI money manager for couples with my co-founder.

## RECENT CONSULTING

C-ME StepLab neumind BerlinRelo

## EARLIER EXPERIENCE

2023–2024

### Flagright

FOUNDING ENGINEER

Built the first version of AI Forensics and helped develop financial crime prevention tools as the customer base grew from early-stage startups to larger banks and financial institutions.

2022–2023

### Fraugster

SENIOR GO ENGINEER

Developed real-time entity linking for fraud detection and supported the workflows used to train and test machine-learning models.

2018–2022

### Kitt

HEAD OF ENGINEERING

Led engineering and built web, mobile and IoT systems to support the letting, delivery and management of office space.

2015–2018

### JustPark

SENIOR SOFTWARE ENGINEER

Developed payment and pricing systems, refactored backend services and expanded integration testing for the parking platform.

2013–2015

### ARM

SOFTWARE & CORES IMPLEMENTATION ENGINEER

Contributed to physical implementation methods for Cortex-M7 and supported a distributed CI/CD platform used by engineering teams across the business.
